# NATTIVA

## *Collection*

Inspired by authenticity and the connection between nature and glamor. Each piece arises from the encounter between the purity of raw emeralds, the organic texture of the iraca palm and the delicacy of filigree, technique that honors ancestral Colombian art.

Our creative process begins with a deep admiration for natural materials and artisanal work. Raw emeralds, with their green color and unique shapes, represent the magnificence of nature. The iraca palm, skillfully woven by rural communities, provides sustainability and tradition. Filigree, an ancient technique, adds elegance and intricate details that evoke stories from past generations.

Each piece is a handmade masterpiece, designed to celebrate the authenticity, art and cultural richness of Colombia. More than jewelry, they are stories woven with passion, commitment and love.

## *Of Authenticity*

*Raw emeralds are natural gems that have not been cutted or polished, maintaining their original shape since their extraction. Their beauty lies in their natural purity, becoming unique and valuable pieces that stand out for their authenticity.*

*We work with raw emeralds obtained ethically and sustainably. We collaborate directly with artisanal miners, boosting the local economy and generating a positive impact on mining communities. Your new treasures have raw emeralds from the world capital of the emeralds, Muzo, Colombia.*
